

How-To: Use CareFlow Administrative Tools

Administrative tools allow administrators to perform maintenance functions inside of CareFlow. To access CareFlow administrative tools follow the steps below.

Using the Settings Tools

1. Click the Applications Menu icon in CareFlow.

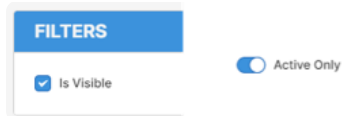

2. From the Applications Menu, click **Settings**. A new tab will open with various CareFlow administrative tools.
3. If you are unsure which tool you need, use the search function or category options to find or filter available admin tools.

Hi , what would you like to do?

Search utilities...

All Appointment Configurations Physicians Insurance List Mammo Patient Info Referral Settings

4. Click a tool to open it.
5. Many tools have a filter that can display what entries are visible in the tool. Uncheck the checkmark or toggle the switch off to see all entries (including hidden/inactive entries).

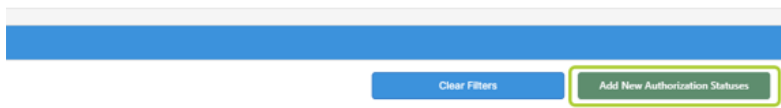

6. Some tools may also have multiple pages of entries. Use the arrows at the bottom to see additional entries.

Showing 1-13 of 31 < 1 of 3 >

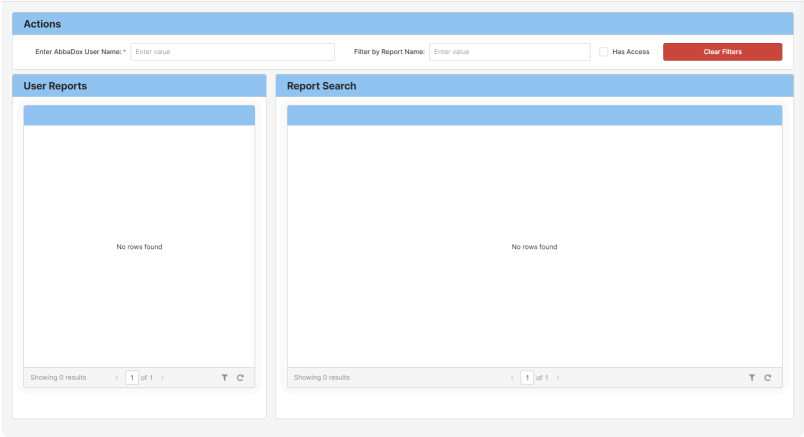

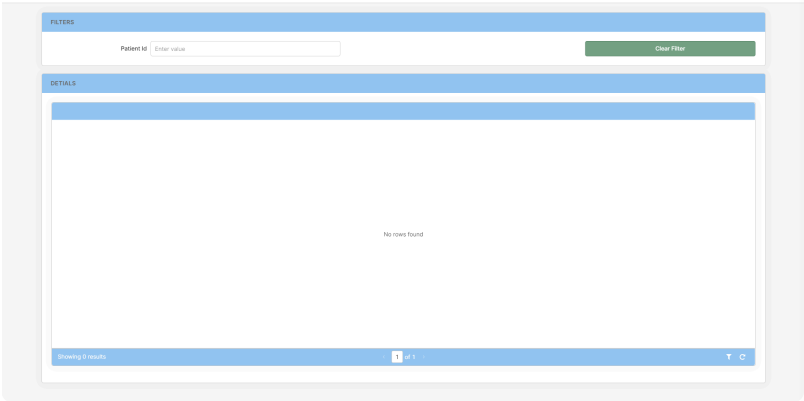

7. To edit an entry, click (or double-click) on the entry name and make modifications.
8. To add new entries to each tool, click the **Add** button. Example:

Authorization Statuses

★ **Favorite Tools** - You can click the star icon on a tool that you frequently use, and it will then be listed at the top of the list of tools for easy access.

Complex Scheduling Template Manager

Create complex combo codes for procedures with different modalities. Most commonly used to create multi-part nuclear medicine orderables or combined mammo and ultrasound orderables. Note, if you need to create a simple combo code with both procedures in the same modality, refer to the Local Procedures tool.

Tool Screenshot

The screenshot displays the 'Edit Rule' interface for creating complex scheduling templates. It features two main sections for defining procedure rules. Each section includes a 'Template Modality' dropdown (set to 'NM'), a 'Complex Procedure Name' field, and a 'Procedure' dropdown. The first rule is for 'NM BONE AND JOINT' with the procedure 'LUGOL THY BLOCKER FOR DAT SCAN (LUGOL)'. It specifies an 'Overhead Min' of 0, 'Buffer Minutes' checked, and 'Buffer Days' unchecked. The second rule is for 'NM BONE SCAN SPECT (76320)' with the procedure 'NM BONE SCAN SPECT (76320)'. It specifies an 'Overhead Min' of 30, 'Buffer Minutes' checked, and 'Buffer Days' unchecked. Both rules have checkboxes for 'Filter for Inactive Procedures', 'Allow Double Bookings', 'Ignore Notification Slots', and 'Parent Appointment'. The 'Parent Appointment' checkbox is checked for the second rule. At the top right, there is an 'Add Appointment' button. At the bottom right, there is a 'Delete Template' button.

Payer Groups

Manage payer group options associated with payers.

Tool Screenshot

The screenshot shows the 'Payer Groups' tool interface. At the top, there's a 'Filters' section with a search bar for 'Payer Group' and a toggle for 'Is Active'. Below this is a table listing various payer groups and their active status.

Payer Group	Is Active
Commercial	✓
HIX - Contracted	✓
Managed Care	✓
Managed Care-Exchanges	✓
Managed Medicaid	✓
Managed Medicare	✓
Medicaid	✓
Medicare	✓
Self Pay	✓

At the bottom, it indicates 'Showing 1-9 of 9' and '1 of 1'.

CareFlow Screenshot

The screenshot shows the 'Edit Payer' interface in CareFlow. It includes fields for 'Payer Information' such as 'Payer ID', 'Payer Name', 'Client Code', 'Website', 'Payer Active', and 'In Network'. A dropdown menu for 'Payer Group' is highlighted with a red box, showing options like 'Commercial', 'HIX - Contracted', 'Managed Care', 'Managed Care-Exchanges', 'Managed Medicaid', 'Managed Medicare', 'Medicaid', 'Medicare', and 'Self Pay'. Below these fields is a table with columns for 'Address 2', 'City', 'State', 'Zip Code', 'Payer Code', 'Active', and 'Actions'. The bottom of the interface has 'Cancel' and 'Save' buttons.

7 User and Role
Assignment

Add or modify users and assign roles to users.

Add a New User

1. Click the **New User** button in the upper right corner and fill out details.

2. Click **Add User**.

Modify an Existing User

1. Search for the user using the filters, then click on the user from the list.

2. In the window that appears, you can modify the first name, last name, and email address of the user.

3. Click the **Actions** button to edit roles, reset the user's password, or block the user.

4. Click the **Save** or **Save Changes** button after making edits.

Referring Provider/Attorney Logins

1. If adding a Referring Provider or Attorney login, be sure to select the role **Referring Physician** (or **Attorney**), then click **Link Referring** (or **Link Attorney**) to associate a referring provider/attorney to the login.
