

MRI PATIENT HISTORY AND SCREENING

Name _____ MRN _____ DOB _____ Weight _____

Are you pregnant or breast feeding _____ The American College of Radiology (ACR) does not recommend routine MRI in women who are in their first or second trimester of pregnancy.

Are you allergic to any medications? (please list) _____

Have you ever had an MRI? If yes, please list type and last date (if known) _____

The following items can cause harm to you as a patient in the MRI scanner. Please check the following as it applies. Please be as accurate as possible.

Do you have a personal history of the following?	Yes	No	Not Sure
Currently undergoing renal dialysis			
IUD, diaphragm or pessary (an inserted medical device)			
Pacemaker or Defibrillator			
Pain medication pump or Infusion pump			
Body piercing (including ears)			
Hearing aid(s)			
Artificial Limbs			
Coronary Stent or bypass clips			
Vena Cava (large abdominal vein) Filter			

Do you have a personal history of the following?	Yes	No	Not Sure
Permanent eyeliner or tattoos			
Cochlear (ear) Implant			
Brain Aneurysm Clips			
Neurostimulator (Tens Unit)			
Claustrophobia			
Shrapnel or Bullets			
Could you ever have had metal in your eyes			
Have you had metal removed from either eye			
Have you had brain surgery?			

List any other metal in your body _____

Brief explanation for your visit _____
(Why does your doctor want you to have an MRI?)

Please remove all metallic objects before entering the MRI including keys, hairpins, barrettes, jewelry, watch, safety pins, paper clips, money clips, credit cards, coins, wallet, belt, pocket knife and clothing with metal. Please note you will be required to wear hearing protection during the MRI procedure to prevent possible hazard related to the loud noise.

During the exam you will receive an injection of gadolinium (an enhancing agent) called Dotarem. You were given a medication guide on Dotarem, the contrast dye that is used at The Breast Center. The FDA and the American College of Radiology list Dotarem as one of the medications with the lowest retention in the body. If you have chronic kidney disease, asthma, allergy disorders, or if you have ever had a bad reaction to anesthesia or other contrast dyes, be sure to tell your doctor or the technologist who is helping you. **Please consult the MRI Technologist if you have questions or concerns before you enter the MR Suite.**

I understand the risks of undergoing the MRI with contrast dye as described and hereby consent to this MRI examination.

Patient Signature _____ Date: _____

I have reviewed and discussed these safety items with the above signed patient or guardian and approve this patient for magnetic resonance imaging.

Technologist Signature _____ Date: _____

For staff use only

Dotarem Lot # _____ Exp. Date _____

Amt. ordered _____ ml Amt. given _____ ml Amt. wasted _____ ml

Injection site _____

Technologist Signature: _____ Date: _____
